Ethos Partners with Innova to Secure 7.75 GW of Renewable Generation Through Accepted Grid Offer

30th November 2022

London, UK – On the 30th of November 2022, Ethos, a driving force in energy development, achieves another remarkable milestone in its mission towards sustainable energy solutions. Ethos proudly announces the acceptance of the final Stage 1 Innova Portfolio grid offer for a 1gigawatt (GW) Battery Energy and Solar energy application to National Grid Lincolnshire. This achievement not only solidifies Ethos's commitment to advancing renewable generation but also establishes a robust partnership with Innova, resulting in a cumulative 7.75 GW of renewable energy generation.

The successful acceptance of Ethos's Innova Portfolio grid offer signifies a significant step forward in Ethos's journey to shape a cleaner energy landscape. By joining forces with Innova, Ethos leverages collective expertise to bring about innovative renewable energy projects that align seamlessly with the evolving needs of the energy sector.

"We are pleased to announce this pivotal accomplishment, highlighting Ethos's dedication to forging a more sustainable energy future," commented Simon Wragg, CEO at Ethos. "Our collaboration with Innova marks a potent alliance, bolstering our capacity to create impactful renewable energy solutions."

Ethos is now working in close partnership with Innova to drive the development of these transformative projects. The joint effort will bring to fruition a remarkable 7.75 GW of renewable generation, contributing significantly to meeting the UK's ambitious clean energy targets. The first connection date for these projects is set for 2026, reflecting the rapid progress Ethos and Innova are making towards a greener energy landscape.
