NEWS RELEASE

Ethos Receives First Stage 2 Offers for 650 MW Solar and Battery Storage Project in Suffolk

10th February 2023

London, UK – On the 10th of February 2023, Ethos achieves yet another significant milestone towards its mission towards a greener and more sustainable energy landscape. Simon Wragg, CEO of Ethos, is thrilled to share that the company has received the first Stage 2 offers from National Grid for an impressive 650 megawatt (MW) Solar and Battery Storage project, set to connect to the Transmission Network in Suffolk.

This accomplishment marks an important juncture in Ethos's journey, underscoring its commitment to playing a crucial role in helping the UK achieve its ambitious renewable energy targets. Furthermore, this project holds the promise of offering much-needed energy security to our nation.

"As we continue to push the boundaries of innovation and sustainable energy solutions, this development exemplifies our dedication to creating tangible impacts on the energy sector," said Simon Wragg, CEO of Ethos. "The Solar and Battery Storage project in Suffolk showcases Ethos's unwavering dedication to not only meeting the energy needs of today, but also ensuring a resilient and secure energy future."

Collaboration remains at the heart of our approach. By working closely with partners, stakeholders, and experts, Ethos is driven to deliver innovative and impactful solutions that drive positive change.

"I want to express my gratitude to the entire Ethos team, whose dedication and expertise continue to propel us forward," added Simon Wragg. "As we embrace the opportunities ahead, I am confident that our efforts will continue to create a lasting impact in the energy sector."

Thank you for your continued support as we work towards a brighter and more sustainable future.
