NEWS RELEASE

Ethos Completes Stage 2 Grid Acceptance for 8 GW with National Grid Electricity System Operator (NG ESO)

24th August 2023

London, UK 24th August 2023 – Ethos are pleased to announce we have completed our Stage 2 grid connection process, achieving 8 GW of new grid connections to National Grid Transmission network. Working together with our Specialist Power System Engineers and legal advisors we have now completed the process of reviewing and accepting the Stage 2 grid offers. This accomplishment showcases our adept use of broad network knowledge and effective teamwork with qualified legal and technical experts who deeply understand the complex details involved.

Ethos has entered all our grid offers into the NG ESO Expression of Interest (EOI) to bring our connection dates forward to help balance the network at the earliest possible date and is progressing development of the sites on a fast-track basis to meet this challenging deadline.

This commitment represents a significant investment to ensure that we meet our targets to help lower energy bills to consumers through additional renewable generation and system balancing.
